The kingdom of Panchala was located around Ramnagar - Bareli in UP with Ahichhatra as its capital. A long series of monarchical coins, of a distinct typology, was issued from here in around 100BC - 150AD. Shivanandi Shri is one of the rare issuers of this series. It is unusual to see the case ending 'Sa' for both words in the coin legend. It might suggest that the issuers are a couple - Shivanandi and Shri - although Shrimali has attributed the coins to a single issuer.

Coins of Shivanandi are extremely rare and only three have been illustrated by Krishna Mohan Shrimali in History of Panchala. This specimen is an unrecorded type of 3.22g. Most coins known so far weighs approximately 1.6g.

*An attractive specimen with a portrait struck in high relief, Good very fine, Extremely rare.*

When Nero succeeded Claudius in AD 54 at just sixteen years of age, few could have foreseen the notoriety that would come to define his reign. During its opening years, however, the young emperor governed under the guidance of the philosopher Seneca and the praetorian prefect Burrus, presiding over a period of relative stability and effective administration. Ancient authors, including Tacitus, regarded these early years as the most successful of Nero's principate before his increasingly autocratic character began to emerge.

Struck in AD 60, this aureus belongs to that comparatively tranquil phase of Nero's reign, before the Great Fire of Rome, the executions of his mother Agrippina and wife Octavia, and the growing unrest that would ultimately bring about his downfall. Its youthful portrait serves as a reminder of an emperor whose promising beginnings stand in striking contrast to the tyranny for which he is chiefly remembered.

Jalal al-Din Mahmud was an ephemeral Sultan who appears to have seized power for a year or two, immediately after the death of Balban who quelled the rebellion of Mu'izz al-Din Tughril. It is possible that he was a son of Tughril and for at least one year, his coins struck at Lakhnauti overlap with the issues of Nasir al-Din Mahmud alias Bughra Shah, the son of Balban, suggesting a struggle for power in which Bughra Shah emerged successful. Jalal al-Din Mahmud's coins are struck from 'land tax of Banga', i.e. Eastern Bengal and it is likely that he launched raids in the province to bring forth tribute to stabilize his rule.

244. **Sultans of Bengal,** silver tanka of **Ghiyath al-Din Bahadur Shah**, **issued jointly** with **Muhammad bin Tughluq**, **Sultan of Dehli** (in 1328 AD), ***Hadrat* Sunargaon** mint, known for year **AH 728**, G&G **B116**, 10.95g. **Obv:** In rectangle, Arabic legend *al-sultan al-mu'azzam ghiyath al-dunya wa'l din abu al-muzaffar bahadur shah al-sultan bin al-sultan*. **Rev:** In rectangle, Arabic legend *darb bi-amr al-wathiq billah muhammad bin tughluq shah*; other details in the margin.
*A wonderful example with a sharp strike and clear details, Extremely fine, Exceedingly rare*.

This remarkable joint issue commemorates a brief but historically significant phase when Ghiyath al-Din Bahadur Shah, the ruler of eastern Bengal, ruled Sunargaon under the authority of Sultan Muhammad bin Tughluq following his release from captivity at Delhi around AH 726. Two years later, in AH 728 (1328 AD), Bahadur issued gold and silver coins bearing his name and that of Muhammad Tughluq. The coins state that they were struck by order of him who trusts in Allah, Muhammad Tughluq; but the later may well have regarded this as an act of rebellion. Bahadur subsequently rebelled against his Delhi master, ultimately meeting an unfortunate end. These coins acknowledge the authority of the Delhi Sultan while simultaneously preserving Bahadur Shah's own royal titles, making this joint issue an exceptional numismatic record of this short-lived political arrangement.

Danujamarddana Deva emerged as a regional ruler in Bengal during a period of political upheaval in the early 15th century, when the authority of the Ilyas Shahi dynasty was challenged by regional powers. His rise to power marked a brief assertion of Hindu rule in Bengal. His coinage, issued from the mints of Chatigrama, Suvarnagrama and Pandunagara, is distinguished by its use of Bengali script and the Saka era, rather than the Arabic legends and Hijri dates customary on the contemporary Bengal Sultanate coinage. The reverse bears the legend *Sri Chandi Charana Parayana* [Devoted to the feet of Goddess Chandi], reflecting the ruler's religious affiliation.

A historically significant pedigree issue of the Sultans of Gujarat, only the second piece known. It is interesting that Ahmad Shah I struck this coin in a denomination introduced by Muhammad Tughlaq and in a type that copied his titles, nearly sixty years after his death, almost like a numismatic homage to him. The mint was located at Shahr Nahrwala a.k.a. Anahillawad Patan, the ancient capital of Gujarat, suitably prefixed 'Hadrat' or venerable. The date on the coin corresponds to 1412-13 and post-dates the foundation of Ahmadabad by only a few months. At this time, Ahmad Shah was busy campaigning against the Bhil chief of Asawal, whose defeat resulted in the foundation of Ahmadabad and the move of the Sultanate's capital from Patan to the new city.

# Mughals

## An Exceptional Assemblage of Mughal silver fractions, including Nisars

Fractional coins are often considered a mystique for collectors - small, easily lost and struck in lower numbers, they are highly desirable. Historically, they offer insights into processes of monetization, money supply, prices and wages, and ritual use. Since the Mughals operated an 'open minting' policy, fractions were struck only if there was specific demand. Sometimes, specially produced dies were employed in striking fractions, but many times dies of larger denominations were also used to impress them on blanks of requisite sizes. The rarity of fractions increases inversely with the denominations - the lower the denomination, the higher is the rarity. This is mainly because getting fractions minted was relatively more expensive - it accrued more minting charges and involved higher wastage. So unless desperately needed, people tended not to get fractions minted.

The assemblage offered here is unique in many ways - it includes fractions of many Mughal emperors starting from Akbar; some of the coins are exceptionally rare, known for the first time, and some are struck for special purposes, like Nisars. Some would be well-known however their condition makes them stand out.

'Dassa' or 1/10 rupee was a denomination introduced by Akbar in his Ilahi coinage to facilitate a better circulatory correspondence between silver and copper coins. Equivalent to 4 copper dams, the Dassa would have been equal to two copper Tankas or double dam coins. Very few Dassa coins are known to exist. Most likely their circulation was curtailed due to the wide availability of copper coins.

*A beautifully toned specimen, with a sharp strike and clearly rendered details.*
*Extremely fine, Unique so far*.

After the conquest of most regional sultanates, Akbar issued a transitional coinage in his name from mints functioning in the predecessor kingdoms. In Malwa, these were Mandu and Ujjain. Coins struck in the name of Akbar follow the visual style and denomination structure of Baz Bahadur from whom Akbar won the province of Malwa. While silver tankas and half tankas of the 7-8g standard are very common, no other fractional issues have been reported. This coin, weighing slightly above for a 1/10th denomination, is the smallest fraction ever known. Its style matches with issues of Ujjain mint; however, owing to its small size the mint name is not visible.

After Jahangir died near Lahore, a power struggle erupted between his consort Noor Jahan and partisans of his son Khurram, who was in rebellion in the Deccan. Noor Jahan's claimant Shahriyar was defeated by Khurram's chief partisan Asaf Khan near Lahore. Asaf Khan proclaimed Khurram in absentia on 29 January 1628. With no remaining opposition, Khurram advanced from Deccan to Agra, where he formally ascended the throne on 14 February 1628.

Since this coin bears the regnal year '1' and not 'Ahd' it was evidently struck before the formal coronation of Shah Jahan. This makes it exceptionally significant because it means it was struck in a very short period of time, only about the first two weeks of February in 1628. The couplet specifically mentions it as a 'gold for scattering' so it is possible that it was produced for rituals held at the temporary court in absentia, by Asaf Khan.

One of the most significant political events of the 21st year of Shah Jahan's reign (corresponding to 1647-48) was the closure of the disastrous Central Asian campaign and Prince Aurangzeb's return to the court at Agra. From March 1648, after the Nowruz celebrations, Aurangzeb was assigned the governorship of Multan. It is plausible that the Nisar marks the holding of the Nowruz court.

In March 1644, just as the 18th regnal year began, Shah Jahan's favourite and highly influential daughter, Princess Jahanara, suffered severe burns when her silk dress caught fire from a candle at the Agra palace. However Jahanara miraculously recovered by late 1644. To celebrate her return to health, Shah Jahan held a massive, lavish festival lasting several days, distributing vast sums of money, jewels, and land grants to the poor and royal officers. The dates on this Nisar fall neatly within the range to suggest a close association with these events.

The most celebratory event in the 9th regnal year of Shah Jahan was formal annexation of the Ahmadnagar Sultanate, ending the independent existence of the Nizam Shahi dynasty. The other Deccan kingdoms of Bijapur (Adil Shahi) and Golconda (Qutb Shahi) were also forced to submit and accept Mughal suzerainty. Daulatabad, once the capital of the Nizam Shahi Sultans, but firmly in Mughal hands for at least a decade, must have been a site for great celebrations for this landmark event. No doubt Nisars would have been struck here to mark them.

Although Shah Jahan was not present at Lahore in the 13th year of his reign, it was a very significant year for the city. Shah Jahan formally ordered the construction of the iconic Shalamar Gardens and the engineering of the Shah Nahar (Royal Canal) to irrigate them. Wazir Khan, the legendary Punjabi Governor, finished many architectural features of the Mughal city, such as the Wazir Khan Mosque, the Shahi Hammam (Royal Baths), and the Wazir Khan Baradari. This suburban expansion saw Lahore's population grow exponentially. Lahore also became the primary military and logistical base for Shah Jahan's ambitious campaigns into the northwest frontier, particularly for consolidating control over Kandahar.

*Notably, only one other example of this type has been found in the sales archives to date.*

Nicholas Rhodes had noticed a similar mark on the square rupees of Bang mint and presented a view that round 'Kalima' type rupees with a similar mark should also be attributed to Bang (article in 'Numismatic Digest', vol.32-33). On these rupees the mint-name was previously read as Bhakkar but of course the reading could fit the orthography of 'Bang' as well. However, the argument is complicated by the fact that hardly any of the anchor/'ship'-marked round rupees have been even found in Bengal, or indeed in Eastern parts of India.

This is the first known gold mohur that corresponds with the 'ship'-marked round rupees. Whether it is Bhakkar or Bang mint, the fact remains that this is an extremely rare variety of Akbar's gold coins. The only other known example of a Mohur of Bhakkar mint is in the Lahore Museum's collection. As regards Bang, only one other round Kalima type Mohur is known for that mint (Zeno #141591).

*Broad flan specimen, Extremely fine, Exceedingly rare in this grade*.

This coin, bearing the usual 'Ilahi' legends of Akbar's coinage of that type, has the word 'Sitpur' written in a curious way which makes it read 'Saimur'. 'Saimur' was the ancient Arabic name of the seaport of Chaul on the Konkan coast so some early numismatists attributed these coins to Chaul. However, when the coins were struck the name 'Saimur' had fallen out of fashion for a long time and Chaul was firmly in control of the Nizam Shahi Sultanate. The additional word 'Darb' which was the denominational term for a half Rupee is also interesting to have appeared on a full Rupee coin.

Rohtasgarh Fort operated as an active imperial mint for a fleeting window between Regnal Years 19 and 20. The catalyst for this sudden issuance was the open rebellion of Jahangir's son, Prince Khurram (the future Shah Jahan), against the imperial court and the political ascendancy of Empress Nur Jahan. In 1624 CE, Khurram's rebel forces swept eastward into Bihar, seizing the formidable hilltop fortress of Rohtasgarh from its imperial garrison. Despite being in active revolt against his father, Khurram did not assume full sovereign status; the garrison struck coins continuing to bear Jahangir's formal titles.

The mint likely served to provide currency for the administration and military requirements of Khurram's forces; and to mark the fortuitous birth of his son, Prince Murad Baksh, born to Mumtaz Mahal within the fort walls in late 1624 CE. By 1625 CE, imperial loyalist forces under General Mahabat Khan pushed Khurram out of Bihar, ceasing operations at the Rohtas mint. Strikingly rare and rich in historical significance, these short-lived coins endure as tangible, metallic witnesses to the dynastic conflict that marked the closing years of Jahangir's reign.

Noor Jahan, the twentieth and final wife of Emperor Jahangir, quickly became his favored consort. As Jahangir's health declined due to years of heavy drinking and opium use, she assumed an active role in the administration of the empire. The emperor's personal diaries reflect his admiration for her loyalty and affection, and he entrusted her with the imperial seal, effectively granting her authority over state affairs. A skilled and astute administrator, Nur Jahan successfully managed multiple crises, including a rebellion led by Prince Khurram, who later ascended the throne as Shah Jahan. Her extraordinary influence is further evidenced by the appearance of her name on coins issued during the final years of Jahangir's reign.

*NGC MS64, Exceedingly rare*.

The present specimen belongs to the celebrated Akola Hoard, discovered in 1974 along the riverbank near Akola, Maharashtra. Comprising gold mohurs of Shah Jahan's Surat mint, Regnal Year 2, month of Azar, the hoard brought to light a previously unknown date for this issue. It is believed that these coins represented a consignment of military payments dispatched from Surat to Mughal troops engaged in campaigns near Golkonda. According to the traditional account, the consignment was lost when sudden monsoon rains flooded the dry riverbed where the transporting caravan had halted overnight, sweeping away the entire shipment.

## Mirza Abu al-Fayaz Qutb al-Din Muhammad Azam Shah (1707 AD)

*Shroff marks, Very fine, Exceedingly rare*.

*Notably, only one other example has appeared in the sales archives to date, highlighting its exceptional rarity*.

Coins in the name of Azam Shah were struck for a brief period when he assumed the kingship on 14th March 1707 at Ahmadnagar, ten days after the demise of his father Aurangzeb. As he had been active in the provinces of Berar, Gujarat and Malwa immediately before this event, most mints striking coins in his name are located in these regions. His coinage ended with his defeat and death at the hands of his stepbrother Muazzam at the battle of Jajau on 8th June 1707. AH1118 is extremely rare, only known for Ahmednagar mint so far. The coin is probably struck while the king halted for 3 days at Aurangabad towards the end of 1118.

In the last year of Farrukhsiyar's reign, the powerful Sayyid Husain Ali Khan - one of the Sayyid Brothers who were effectively the king-makers in Delhi - was the viceroy of Deccan. Sholapur at this time was de jure under his control. However the area was witnessing growing political instability, with the Marathas, the Nizam and the Delhi appointees, all jostling for power. In 1718, the Marathas secured the rights to collect tributes from the province of Deccan. Perhaps, the crude execution of this coin suggests a Maratha connection.

Muhammadabad was the alias of Bidar, a strategic fortress in North Karnataka, after Muhammad Shah Bahmani. During Aurangzeb's reign it was changed to 'Zafarabad' to mark his victory against the Deccani Sultanate combine. It reverted to Muhammadabad after Aurangzeb's death in 1707. This coin bears the rare 'Aman wa Amān' couplet for Shahjahan II, a short -lived emperor. It also bears AH 1132 which began in mid-November 1719, which is nearly two months after Shahjahan had died. The coin is thus a posthumous issue, perhaps prompted by political uncertainty in end-1719, owing to the fall of the Sayyid Brothers.

*An attractive specimen, struck in high relief with sharply rendered details, offering superb eye appeal. Uncirculated, Extremely rare mint for the ruler.*

Founded in 1494, Ahmadnagar was the capital of the Nizam Shahi sultanate, one of the successor states of the Bahmani kingdom. It fell to the Mughals under Akbar, but Mughal control of the Deccan remained uncertain through the reigns of Jahangir and Shah Jahan. Under Aurangzeb the city became a key base for Mughal operations in the south, and he died there in 1707. Its mint struck rupees under successive emperors. This issue belongs to the reign of Muhammad Shah (AH 1131 -1161 / 1719-1748 AD), when Mughal authority in the Deccan was giving way to the Nizam of Hyderabad and the rising Maratha power. Even so, the mint continued to issue coins in the emperor's name, showing that his sovereignty was still formally recognised.

*A wonderful example, Extremely fine, Extremely rare.*

One of the rarest varieties of Maratha coins, the 'Shri' rupee of Alibag circulated in the territory of the Angrey family, on the Konkan coast south of Mumbai. The Angreys were the hereditary admirals of the Maratha navy, until it was scuttled owing to a feud with the Peshwas. The coin is referred to in the Bombay Gazette as the 'Janjira-Colaba' or 'New Alibaug' rupee. The person responsible for its issue was Vinayak Parshuram Biwalkar, the Chief Officer (Diwan or Karbhari) of the Angreys, who introduced it in around 1829. It was not at all popular, because of its lower silver contents and ceased to be circulated within a decade. In 1844, the Angrey Estates lapsed to the British when permission to succession by adoption was denied.

A similar coin was sold in our Auction 51 (2026), Lot no. 449 at hammer Rs. 6,50,000.

Ujjain became the seat of the Sindhias after Peshwa Baji Rao I divided the province of Malwa between his trusted lieutenants - Udaji Rao Pawar, Malhar Rao Holkar and Ranoji Sindhia.

In 1755, the claimant to the Sindhia domains, Jayappa Sindhia, was killed in Mewar's war of succession. His young son Jankoji succeeded him but as he was only ten years old, his uncle Dattaji Sindhia acted as regent.

The most important event during the period in which this Nisar was struck, was the Maratha capture of Delhi on 11 August 1757, ousting Najib Khan Rohilla and restoring Imad ul-Mulk as the Wazir. The Sindhia troops played an important part in the battle. It is plausible that the Sindhias celebrated this momentous event by striking nisars at their principal seat, in the name of the emperor who was effectively a Maratha protege. Only one other example of this issue is known to exist.

*A strong example that will undoubtedly capture much attention from numerous collectors.*

A gold issue of exceptional rarity, probably struck from silver mudra dies (listed in KM BHS #393), only two or three of these enigmatic gold mohurs are known to exist in collectors' hands.

In 1877, Tukoji attended the imperial durbar at Delhi, where he was granted a personal 21-gun salute and appointed 'Mushir -i-Khas-i-Kaisar-i-Hind' (Councilor of the Empress of India). This prestigious occasion is believed to have inspired the issue of this gold mudra which was intended for presentation purposes.

The present gold Nazarana mohur, belongs to the distinctive Mudra coinage of Indore introduced during his reign. Its Sanskrit legends, engraved in Devanagari, carry a notable genealogical reference to the Holkar dynasty, invoking Ahilyabai Holkar and Malhar Rao Holkar while identifying Tukoji as the ruler of Indore.

According to Dr. Shailendra Bhandare (Zeno #218306), the inscription on this coin is split between the two sides. It reads - श्रीमहाराजशैवमल्लारिश्रुषाहल्या पौत्रेंदुराधीशतुकोजीहोळकर. There are two Sandhis or compounds here - श्रुषा + अहल्या and पौत्र + इंदुराधीश. After breaking them apart, we get the meaning: "Tukoji Holkar, the King of Indore, (who is) the grandson of Ahalya, the daughter-in-law of the king Malhari, the devotee of Shiva".

Sahib Singh ascended the throne of Patiala in 1781, after the death of his father Amar Singh. In 1794, the Marathas invaded Patiala; however, Sahib Kaur managed to successfully repel them. The date on this coin corresponds to this year and it is plausible that it was struck to commemorate the victory. The British East India Company at Bombay operated its own mint since 1672, but found trade very difficult as their coins with English designs were not readily accepted by the local businessmen. They could not officially strike coins in the name of the Mughal emperor, as they were technically not his subjects. To remedy this situation, they resorted to strike coins in the names the British sovereigns but resembling Mughal coins in every other respect such as the use of Farsi script.

The coins were brought to the notice of Mughal emperor Aurangzeb soon and he was very annoyed at their sight. He sent Khafi Khan, a nobleman who would later become famous also as a Mughal chronicler, to Bombay and threatened the British with dire consequences if the coins were not withdrawn immediately. The British complied with the Emperor's demand under the threat of an impending military action. The coins were all withdrawn and melted down in 1696. The issue was thus very short-lived.

Coins of this type were unknown until 1960, when P L Gupta located a few specimens in the collection of the Prince of Wales Museum (now CSMVS) in Bombay. He published them along with historical context as outlined by Khafi Khan.

# TERMS OF AUCTION

1. This is a public auction sale conducted by Classical Numismatic Gallery, a licensed Auctioneer, issued by the Archaeology Survey of India, (hereinafter referred to as "Auctioneer"). Bidding in this Auction constitutes acceptance by you (the "Bidder") of all the Terms and conditions stated herein and shall be bound by them. Bidders may include consignors who may bid and purchase lots in the Auction consigned by the consignor or by other consignors. The Buyer is the Bidder who makes the highest bid accepted by the Auctioneer. Only Indian residents/NRIs having valid address in India can bid in our Auctions.

2. Lots may carry a Reserve. A Reserve is a confidential price or bid below which the Auctioneer will not sell an item or will re-purchase on behalf of the Consignor.

3. All lots are guaranteed genuine. Any claim of lack of authenticity must be made in writing by the original purchaser immediately after discovery that an item is not authentic, and upon making such a claim Classical Numismatic Gallery shall, in its sole and absolute discretion, reserve the right to consult and rely upon any expert(s) or authority considered by him reliable in establishing the authenticity of that lot. If the lot is then proved not authentic then the original purchaser must immediately return the lot to Classical Numismatic Gallery in the same condition as at the time of the auction with the original Invoice and payment proof. Lots that have been encapsulated ("slabbed")/Graded by a grading and/or authentication service may not be returned for any reason, including authenticity, if they have been removed from the encapsulation ("slab")/Grading.

4. Lots are sold as shown with all faults, imperfections and errors of description. Attribution, date, condition, and other descriptions are the opinion of the cataloguer, and no warranty is expressed or implied. Neither the auctioneer nor the seller shall give warranty to any buyer in respect of any lot, or be liable for any fault or error of description. All statements as to the items sold, whether made in catalogues, during the course of the auction, or otherwise are statements of opinion only, and are not and shall not be taken to be statements or representations of fact. The auctioneer reserves the right in forming his opinion, to consult and rely upon any expert or authority considered by him reliable. Notwithstanding the forgoing, if any lot should have been wrongly described in any material aspect, the buyer may reject the same, provided that he shall have given notice of intention to do so and shall have returned the same to the auctioneer within seven (7) days from the day of the Auction, Under no circumstances will the auctioneer be liable for any costs, expenses or damages incurred by the buyer in respect of any lot, including, but not limited to, loss of any kind of profit whatsoever. Estimates are intended as a guide only and not as a statement of opinion of value. Bidders are advised to scrutinize the lots they bid for.

5. The Auctioneer shall have the right to open or accept the bidding on any lot by placing a bid on behalf of the Consignor, a Bidder by mail, telephone, internet, or any other participant in the Auction. Bids must be for an entire lot and each lot constitutes a separate sale. Lots will be sold in their numbered sequence unless Auctioneer directs otherwise. Auctioneer shall have the right in his or her sole and absolute discretion to accept or decline any bid, challenge any bid or bidding increment, to reduce any mail bid received, adjudicate all bidding disputes and to determine the prevailing bid. The Auctioneer shall have the right, but not the obligation, to rescind the acceptance of any bid and place the lot for Auction again. Auctioneer's decision on all bidding disputes shall be binding and final.

6. No "unlimited" or "buy" bids will be accepted. When identical bids are received for a lot, preference is given to the first bid received as determined by the Auctioneer. A mail bid will take precedence over an identical floor bid. Bids will not be accepted from persons under eighteen (18) years of age. The estimate figure below each lot are the auctioneer's estimate of an expected price only, bids which are less than the lower estimate will not be consider by the auctioneer.

7. Your bids will be treated as your maximum bid. Classical Numismatic Gallery is not responsible for any errors in bidding.
